English Appendix 2: Vocabulary, grammar and punctuation

The grammar of our first language is learnt naturally and implicitly through interactions with other speakers and from reading. Explicit knowledge of grammar is, however, very important, as it gives us more conscious control and choice in our language. Building this knowledge is best achieved through a focus on grammar within the teaching of reading, writing and speaking. Once pupils are familiar with a grammatical concept (for example 'modal verb'), they should be encouraged to apply and explore this concept in the grammar of their own speech and writing and to note where it is used by others. Young pupils, in particular, use more complex language in speech than in writing, and teachers should build on this, aiming for a smooth transition to sophisticated writing.

The table below focuses on Standard English and should be read in conjunction with the programme of study as it sets out the statutory requirements. The first column refers to the structure of words and vocabulary building. The table shows when concepts should be introduced first, not necessarily when they should be completely understood. It is very important, therefore, that the content in earlier years be revisited in subsequent years to consolidate knowledge and build on pupils' understanding. Teachers should also go beyond the content set out here if they feel it is appropriate.

The grammatical terms that pupils should learn are set out in the final column. They should learn to recognise and use the terminology through discussion and practice. All terms in **bold** should be understood with the meanings set out in the glossary.

Years 1 to 6

Year	Word	Sentence	Text	Punctuation	Terminology for pupils
1	Regular plural noun suffixes –s or –es (e.g. dog, dogs; wish, wishes), including the effects of these suffixes on the meaning of the noun Suffixes that can be added to verbs where no change is needed in the spelling of root words (e.g. helping, helped, helper) How the prefix un—changes the meaning of verbs and adjectives (negation, e.g. unkind, or undoing, e.g. untie the boat)	How words can combine to make sentences Joining words and joining clauses using and	Sequencing sentences to form short narratives	Separation of words with spaces Introduction to capital letters, full stops, question marks and exclamation marks to demarcate sentences Capital letters for names and for the personal pronoun I	letter, capital letter word, singular, plural sentence punctuation, full stop, question mark, exclamation mark
2	Formation of nouns using suffixes such as <i>-ness</i> , <i>-er</i> and by compounding (e.g. whiteboard, superman) Formation of adjectives using suffixes such as <i>-ful</i> , <i>-less</i> (A fuller list of suffixes can be found in the year 2 spelling appendix.) Use of the suffixes <i>-er</i> , <i>-est</i> in adjectives and <i>-</i> ly to turn adjectives into adverbs	Subordination (using when, if, that, because) and coordination (using or, and, but) Expanded noun phrases for description and specification (e.g. the blue butterfly, plain flour, the man in the moon) How the grammatical patterns in a sentence indicate its function as a statement, question, exclamation or command	Correct choice and consistent use of present tense and past tense throughout writing Use of the progressive form of verbs in the present and past tense to mark actions in progress (e.g. she is drumming, he was shouting)	Use of capital letters, full stops, question marks and exclamation marks to demarcate sentences Commas to separate items in a list Apostrophes to mark where letters are missing in spelling	noun, noun phrase statement, question, exclamation, command, compound, adjective, verb, suffix tense (past, present) apostrophe, comma

3	Formation of nouns using a range of prefixes , such as super—, anti—, auto— Use of the forms a or an according to whether the next word begins with a consonant or a vowel (e.g. a rock, an open box) Word families based on common words, showing how words are related in form and meaning (e.g. solve, solution, solver, dissolve, insoluble)	Expressing time, place and cause using conjunctions (e.g. when, before, after, while, so, because), adverbs (e.g. then, next, soon, therefore), or prepositions (e.g. before, after, during, in, because of)	Introduction to paragraphs as a way to group related material Headings and sub-headings to aid presentation Use of the present perfect form of verbs instead of the simple past (e.g. He has gone out to play contrasted with He went out to play)	Introduction to inverted commas to punctuate direct speech	adverb, preposition conjunction word family, prefix clause, subordinate clause direct speech consonant, consonant letter vowel, vowel letter inverted commas (or 'speech marks')
4	The grammatical difference between plural and possessive -s Standard English forms for verb inflections instead of local spoken forms (e.g. we were instead of we was, or I did instead of I done)	Noun phrases expanded by the addition of modifying adjectives, nouns and preposition phrases (e.g. the teacher expanded to: the strict maths teacher with curly hair) Fronted adverbials (e.g. <u>Later that day</u> , I heard the bad news.)	Use of paragraphs to organise ideas around a theme Appropriate choice of pronoun or noun within and across sentences to aid cohesion and avoid repetition	Use of inverted commas and other punctuation to indicate direct speech e.g. a comma after the reporting clause; end punctuation within inverted commas (e.g. The conductor shouted, "Sit down!") Apostrophes to mark singular and plural possession (e.g. the girl's name, the girls' names) Use of commas after fronted adverbials	determiner pronoun, possessive pronoun, adverbial
5	Converting nouns or adjectives into verbs using suffixes (e.gate; -ise; -ify) Verb prefixes (e.g. dis-, de-, mis-, over- and re-)	Relative clauses beginning with who, which, where, when, whose, that, or an omitted relative pronoun Indicating degrees of possibility using adverbs (e.g. perhaps, surely) or modal verbs (e.g. might, should, will, must)	Devices to build cohesion within a paragraph (e.g. <i>then</i> , <i>after that</i> , <i>this</i> , <i>firstly</i>) Linking ideas across paragraphs using adverbials of time (e.g. <i>later</i>), place (e.g. <i>nearby</i>) and number (e.g. <i>secondly</i>)	Brackets, dashes or commas to indicate parenthesis Use of commas to clarify meaning or avoid ambiguity	modal verb, relative pronoun relative clause parenthesis, bracket, dash cohesion, ambiguity

6	The difference between vocabulary typical of informal speech and vocabulary appropriate for formal speech and writing (e.g. find	Use of the passive to affect the presentation of information in a sentence (e.g. <i>I broke the window in the greenhouse</i> versus <i>The</i>	Linking ideas across paragraphs using a wider range of cohesive devices : repetition of a word or phrase, grammatical	Use of the semi-colon, colon and dash to mark the boundary between independent clauses (e.g. It's raining; I'm fed up)	subject, object active, passive synonym, antonym ellipsis, hyphen, colon, semi- colon, bullet points
	out – discover; ask for – request; go in – enter)	window in the greenhouse was broken [by me]).	connections (e.g. the use of adverbials such as on the other hand, in contrast, or as	Use of the colon to introduce a list	
	How words are related by	The difference between	a consequence), and ellipsis	Dunatuation of bullet points	
	meaning as synonyms and antonyms (e.g. <i>big, large, little</i>).	The difference between structures typical of informal speech and structures	Layout devices, such as headings, sub-headings,	Punctuation of bullet points to list information	
	,	appropriate for formal speech and writing (such as	columns, bullets, or tables, to structure text	How hyphens can be used to avoid ambiguity (e.g. <i>man</i>	
		the use of question tags, e.g. He's your friend, isn't he?, or		eating shark versus man- eating shark, or recover	
		the use of subjunctive forms such as If <u>I were</u> or <u>Were</u>		versus re-cover)	
		they to come in some very formal writing and speech)			

Glossary for the programmes of study for English

The following glossary includes all the technical grammatical terms used in the programmes of study for English, as well as others that might be useful. It is intended as an aid for teachers, not as the body of knowledge that should be learnt by pupils. Apart from a few which are used only in schools (e.g. *root word*), the terms below are used with the meanings defined here in most modern books on English grammar. It is recognised that there are different schools of thought on grammar, but the terms defined here clarify those being used in the programmes of study. For further details, teachers should consult the many books that are available.

Terms in definitions

As in any tightly structured area of knowledge, grammar, vocabulary and spelling involve a network of technical concepts that help to define each other. Consequently, the definition of one concept builds on other concepts that are equally technical. Concepts that are defined elsewhere in the glossary are hyperlinked. For some concepts, the technical definition may be slightly different from the meaning that some teachers may have learnt at school or may have been using with their own pupils; in these cases, the more familiar meaning is also discussed.

active voice	An active verb has its usual pattern of subject and object	Active: The school arranged a visit.
	(in contrast with the passive).	Passive: A visit was arranged by the school.
adjective	 The surest way to identify adjectives is by the ways they can be used: before a noun, to make the noun's meaning more specific (i.e. to modify the noun), or after the verb be, as its complement. 	The pupils did some really good work. [adjective used before a noun, to modify it] Their work was good. [adjective used after the verb be, as its complement]
	Adjectives cannot be modified by other adjectives. This distinguishes them from nouns, which can be. Adjectives are sometimes called "describing words" because they pick out single characteristics such as size or colour. This is often true, but it doesn't help to distinguish adjectives from other word classes, because verbs, nouns and adverbs can do the same thing.	Not adjectives: The lamp glowed. [verb] It was such a bright red! [noun] He spoke loudly. [adverb] It was a French grammar book. [noun]
adverb	The surest way to identify adverbs is by the ways they can be used: they can modify a verb, an adjective, another adverb or even a whole clause. Adverbs are sometimes said to describe manner or time. This is often true, but it doesn't help to distinguish adverbs from other word classes that can be used as adverbials, such as preposition phrases, noun phrases and subordinate clauses.	Usha soon started snoring loudly. [adverbs modifying the verbs started and snoring] That match was really exciting! [adverb modifying the adjective exciting] We don't get to play games very often. [adverb modifying the other adverb, often] Fortunately, it didn't rain. [adverb modifying the whole clause 'it didn't rain' by commenting on it] Not adverbs: Usha went up the stairs. [preposition phrase used as adverbial] She finished her work this evening. [noun phrase used as adverbial] She finished when the teacher got cross. [subordinate clause used as adverbial]
adverbial	An adverbial is a word or phrase that is used, like an adverb, to modify a verb or clause. Of course, <u>adverbs</u> can be used as adverbials, but many other types of words and phrases can be used this way, including <u>preposition phrases</u> and <u>subordinate clauses</u> .	The bus leaves <u>in five minutes</u> . [preposition phrase as adverbial: modifies leaves] She promised to see him <u>last night</u> . [noun phrase modifying either promised or see, according to the intended meaning] She worked until she had finished. [subordinate clause as adverbial]
antonym	Two words are antonyms if their meanings are opposites.	hot - cold light - dark light - heavy
apostrophe	Apostrophes have two completely different uses: showing the place of missing letters (e.g. <i>l'm</i> for <i>l am</i>) marking possessives (e.g. <i>Hannah's mother</i>). 	I'm going out and I won't be long. [showing missing letters] Hannah's mother went to town in Justin's car. [marking possessives]
article	The articles <i>the</i> (definite) and <i>a</i> or <i>an</i> (indefinite) are the most common type of <u>determiner</u> .	<u>The</u> dog found <u>a</u> bone in <u>an</u> old box.

auvilianu varh	The auxiliary works are he have and do and the model	They are winning the match. [be used in the progressive]
auxiliary verb	The auxiliary <u>verbs</u> are <i>be, have</i> and <i>do</i> and the <u>modal</u> verbs. They can be used to make questions and negative	
	statements. In addition:	Have you finished your picture? [have used to make a question, and the perfect]
	 be is used in the <u>progressive</u> and <u>passive</u> 	No, I don't know him. [do used to make a negative; no other auxiliary is present]
	 have is used in the perfect do is used to form questions and negative statements if no other auxiliary verb is present 	<u>Will</u> you come with me or not? [modal verb will used to make a question about the other person's willingness]
clause	A clause is a special type of <u>phrase</u> whose <u>head</u> is a <u>verb</u> . Clauses can sometimes be complete sentences. Clauses may be main or subordinate.	It was raining. [single-clause sentence] It was raining but we were indoors. [two finite clauses]
	Traditionally, a clause had to have a <u>finite verb</u> , but most modern grammarians also recognise non-finite clauses.	If you are coming to the party, please let us know. [finite subordinate clause inside a finite main clause] Usha went upstairs to play on her computer. [non-finite clause]
cohesion	A text has cohesion if it is clear how the meanings of its	A visit has been arranged for year 6, to the Mountain Peaks Field Study Centre,
Collesion	parts fit together. <u>Cohesive devices</u> can help to do this.	leaving school at 9.30am. This is an overnight visit. The centre has beautiful
	In the example, there are repeated references to the same thing (shown by the different colours and underlines), and the logical relations, such as time and cause, between different parts are clear.	grounds and a nature trail. During the afternoon, the children will follow the trail.
cohesive device	Cohesive devices are words used to show how the different parts of a text fit together. In other words, they create <u>cohesion</u> .	Julia's dad bought her a football. <u>The football was expensive!</u> [determiner; refers us back to a particular football] Joe was given a bike for Christmas. <u>He liked it very much</u> . [the pronouns refer back
	Some examples of cohesive devices are:	to Joe and the bike]
	 determiners and pronouns, which can refer back to earlier words conjunctions and adverbs, which can make 	We'll be going shopping before we go to the park. [conjunction; makes a relationship of time clear]
	relations between words clear ellipsis of expected words.	I'm afraid we're going to have to wait for the next train. Meanwhile, we could have a cup of tea. [adverb; refers back to the time of waiting]
		Where are you going? [] To school! [ellipsis of the expected words I'm going; links the answer back to the question]
complement	A verb's subject complement adds more information	She is our teacher. [adds more information about the subject, she]
	about its <u>subject</u> , and its object complement does the same for its object.	They seem very competent. [adds more information about the subject, they]
	Unlike the verb's object, its complement may be an adjective. The verb <i>be</i> normally has a complement.	Learning makes me <u>happy</u> . [adds more information about the object, me]
compound,	A compound word contains at least two root words in	blackbird, blow-dry, bookshop, ice-cream, English teacher, inkjet, one-eyed, bone-
compounding	its morphology; e.g. whiteboard, superman. Compounding is very important in English.	dry, baby-sit, daydream, outgrow
	1 1	ı

conjunction	A conjunction links two words or phrases together.	James bought a bat and ball. [links the words bat and ball as an equal pair]
	There are two main types of conjunctions:	Kylie is young but she can kick the ball hard. [links two clauses as an equal pair]
	 <u>co-ordinating</u> conjunctions (e.g. and) link two words or phrases together as an equal pair 	Everyone watches when Kyle does back-flips. [introduces a subordinate clause]
	 subordinating conjunctions (e.g. when) introduce a <u>subordinate clause</u>. 	Joe can't practise kicking because he's injured. [introduces a subordinate clause]
consonant	A sound which is produced when the speaker closes off	/p/ [flow of air stopped by the lips, then released]
	or obstructs the flow of air through the vocal tract, usually using lips, tongue or teeth.	/t/ [flow of air stopped by the tongue touching the roof of the mouth, then released]
	Most of the letters of the alphabet represent consonants.	/f/ [flow of air obstructed by the bottom lip touching the top teeth]
	Only the letters a, e, i, o, u and y can represent vowel sounds.	/s/ [flow of air obstructed by the tip of the tongue touching the gum line]
continuous	See progressive	
co-ordinate,	Words or phrases are co-ordinated if they are linked as	Susan and Amra met in a café. [links the words Susan and Amra as an equal pair]
co-ordination	an equal pair by a co-ordinating <u>conjunction</u> (i.e. <i>and</i> , <i>but</i> , <i>or</i>).	They talked and drank tea for an hour. [links two clauses as an equal pair]
	In the examples on the right, the co-ordinated elements are shown in the same colour, and the conjunction is underlined.	Susan got a bus but Amra walked. [links two clauses as an equal pair]
	The difference between co-ordination and <u>subordination</u> is that, in subordination, the two linked elements are not equal.	Not co-ordination: They ate <u>before</u> they met. [before introduces a subordinate clause]
determiner	A determiner specifies a noun as known or unknown, and it goes before any modifiers (e.g. adjectives or other	the home team [article, specifies the team as known] a good team [article, specifies the team as unknown]
	nouns).	that pupil [demonstrative, known]
	Some examples of determiners are: • articles (the, a or an)	Julia's parents [possessive, known]
	• demonstratives (e.g. <i>this</i> , <i>those</i>)	some big boys [quantifier, unknown]
	• possessives (e.g. my, your)	
	• quantifiers (e.g. some, every).	Contrast: home <u>the team big some boys</u> [both incorrect, because the determiner should come before other modifiers]
digraph	A type of grapheme where two letters represent	The digraph <u>ea</u> in <u>ea</u> ch is pronounced /i:/.
	one phoneme.	The digraph <u>sh</u> in <u>sh</u> ed is pronounced /ʃ/.
	Sometimes, these two letters are not next to one another; this is called a split digraph.	The split digraph <u>i–e</u> in <u>line</u> is pronounced /aɪ/.
ellipsis	Ellipsis is the omission of a word or phrase which is	Frankie waved to Ivana and she watched her drive away.
	expected and predictable.	She did it because she wanted to do it.

. (A compette of constant to the Linear Constant of the Constant	The control of the co	
etymology	A word's etymology is its history: its origins in earlier	The word <i>school</i> was borrowed from a Greek word \acute{o} ÷ $\ddot{i}\ddot{e}P$ (<i>skholé</i>) meaning 'leisure'.	
	forms of English or other languages, and how its form and meaning have changed. Many words in English have	The word <i>verb</i> comes from Latin <i>verbum</i> , meaning 'word'. The word <i>mutton</i> comes from French <i>mouton</i> , meaning 'sheep'.	
	come from Greek, Latin or French.	The word multon comes from French modion, meaning sneep.	
finite verb	Every sentence typically has at least one verb which is	Lizzie does the dishes every day. [present tense]	
	either past or present tense. Such verbs are called 'finite'.		
	The imperative verb in a command is also finite.	Even Hana did the dishes yesterday. [past tense]	
	Verbs that are not finite, such as participles or infinitives,	Do the dishes, Naser! [imperative]	
	cannot stand on their own: they are linked to another verb	Mark College and the	
	in the sentence.	Not finite verbs: I have done them. [combined with the finite verb have]	
		I will do them. [combined with the finite verb will]	
		I want to do them! [combined with the finite verb want]	
fronting,	A word or phrase that normally comes after the verb may	Before we begin, make sure you've got a pencil.	
fronted	be moved before the verb: when this happens, we say it	[Without fronting: Make sure you've got a pencil before we begin.]	
	has been 'fronted'. For example, a fronted adverbial is	[vviiiout fronting. Wake sure you've got a pendi before we begin.]	
	an <u>adverbial</u> which has been moved before the verb.	The development Recognition was every delegated	
	When writing fronted phrases, we often follow them with a	The day after tomorrow, I'm visiting my granddad.	
	comma.	[Without fronting: I'm visiting my granddad the day after tomorrow.]	
future	Reference to future time can be marked in a number of	He will leave tomorrow. [present-tense will followed by infinitive leave]	
	different ways in English. All these ways involve the use	He may leave tomorrow. [present-tense may followed by infinitive leave]	
	of a <u>present-tense</u> <u>verb</u> .	He leaves tomorrow. [present-tense leaves]	
	See also tense.	-	
	Unlike many other languages (such as French, Spanish	He is going to leave tomorrow. [present tense is followed by going to plus the infinitive leave]	
	or Italian), English has no distinct 'future tense' form of	Infinitive leave]	
	the verb comparable with its <u>present</u> and <u>past</u> tenses.		
GPC	See grapheme-phoneme correspondences.		
grapheme	A letter, or combination of letters, that corresponds to a	The grapheme <u>t</u> in the words <u>ten</u> , <u>bet</u> and <u>ate</u> corresponds to the phoneme /t/.	
	single <u>phoneme</u> within a word.	The grapheme <u>ph</u> in the word dol <u>ph</u> in corresponds to the phoneme /f/.	
grapheme-	The links between letters, or combinations of letters,	The grapheme s corresponds to the phoneme /s/ in the word see, but	
phoneme	(graphemes) and the speech sounds (phonemes) that		
corresponden	they represent.	it corresponds to the phoneme /z/ in the word easy.	
ces	In the English writing system, graphemes may	lt corresponds to the phoneme /z/ in the word easy.	
	correspond to different phonemes in different words.		
head	See phrase		
homonym	Two different words are homonyms if they both look	Has he <u>left</u> yet? Yes – he went through the door on the <u>left</u> .	
	exactly the same when written, and sound exactly the same when pronounced.	The noise a dog makes is called a <u>bark</u> . Trees have <u>bark</u> .	
	same when pronounced.		

homophone	Two different words are homophones if they sound	<u>hear</u> , <u>here</u>		
	exactly the same when pronounced.	some, sum		
infinitive	A verb's infinitive is the basic form used as the head-word	I want to <u>walk</u> .		
	in a dictionary (e.g. walk, be).	I will <u>be</u> quiet.		
	Infinitives are often used:			
	after toafter modal verbs.			
inflection	When we add -ed to walk, or change mouse to mice, this	dogs is an inflection of dog.		
	change of morphology produces an inflection ('bending')	went is an inflection of go.		
	of the basic word which has special grammar (e.g. past			
	tense or plural). In contrast, adding -er to walk produces a completely different word, walker, which is part of the	better is an inflection of good.		
	same word family. Inflection is sometimes thought of as			
	merely a change of ending, but, in fact, some words			
	change completely when inflected.			
intransitive verb	A verb which does not need an object in a sentence to	The old woman <u>died</u> . We all laughed.		
main clause	complete its meaning. See 'transitive verb'. A sentence contains at least one clause which is not	It was raining but the sun was shining. [Two main clauses]		
mam clause	a subordinate clause; such a clause is a main clause. A	The man who wrote it told me that it was true. [One main clause containing two		
	main clause may contain any number of subordinate	subordinate clauses.]		
	clauses.	She said, "It rained all day." [One main clause containing another.]		
modal verb	Modal verbs are used to change the meaning of	I <u>can</u> do this maths work by myself.		
	other <u>verbs</u> . They can express meanings such as certainty, ability, or obligation. The main modal verbs are	This ride may be too scary for you!		
	will, would, can, could, may, might, shall, should, must	You <u>should</u> help your little brother.		
	and ought.	Is it going to rain? Yes, it might.		
	A modal verb only has finite forms and has no suffixes	Canning swim is important. [not possible because can must be finite; contrast: Being		
	(e.g. I sing? he sings, but not I must - he musts).	able to swim is important, where being is not a modal verb]		
modify,	One word or phrase modifies another by making its	In the phrase primary-school teacher.		
modifier	meaning more specific.	to a bar is modified by mineral cobool (to make a cobool to make the set of the set of		
	Because the two words make a <u>phrase</u> , the 'modifier' is normally close to the modified word.	teacher is modified by primary-school (to mean a specific kind of teacher) school is modified by primary (to mean a specific kind of school).		

morphology	A word's morphology is its internal make-up in terms of <u>root words</u> and <u>suffixes</u> or <u>prefixes</u> , as well as other kinds of change such as the change of <i>mouse</i> to <i>mice</i> . Morphology may be used to produce different <u>inflections</u> of the same word (e.g. <i>boy - boys</i>), or entirely new words (e.g. <i>boy - boyish</i>) belonging to the same <u>word family</u> . A word that contains two or more root words is	dogs has the morphological make-up: dog + s. unhelpfulness has the morphological make-up: unhelpful + ness where unhelpful = un + helpful and helpful = help + ful
	a compound (e.g. news+paper, ice+cream).	
noun	The surest way to identify nouns is by the ways they can	Our <u>dog</u> bit the <u>burglar</u> on his <u>behind!</u>
	be used after <u>determiners</u> such as <i>the</i> : for example, most nouns will fit into the frame "The matters/matter."	My big <u>brother</u> did an amazing <u>jump</u> on his <u>skateboard</u> .
	Nouns are sometimes called "naming words" because	Actions speak louder than words.
	they name people, places and "things"; this is often true, but it doesn't help to distinguish nouns from other <u>word classes</u> . For example, <u>prepositions</u> can name places and <u>verbs</u> can name 'things' such as actions.	Not nouns: He's <u>behind you!</u> [this names a place, but is a preposition, not a noun] She can <u>jump</u> so high! [this names an action, but is a verb, not a noun]
	Nouns may be classified as common (e.g. <i>boy</i> , <i>day</i>) or proper (e.g. <i>Ivan</i> , <i>Wednesday</i>), and also as countable (e.g. <i>thing</i> , <i>boy</i>) or non-countable (e.g. <i>stuff</i> , <i>money</i>). These classes can be recognised by the determiners they combine with.	common, countable: a <u>book</u> , <u>books</u> , two <u>chocolates</u> , one <u>day</u> , fewer <u>ideas</u> common, non-countable: <u>money</u> , some <u>chocolate</u> , less <u>imagination</u> proper, countable: <u>Marilyn</u> , <u>London</u> , <u>Wednesday</u>
noun phrase	A noun phrase is a <u>phrase</u> with a noun as its <u>head</u> , e.g.	Adult foxes can jump. [adult modifies foxes, so adult belongs to the noun phrase]
	some foxes, foxes with bushy tails. Some grammarians recognise one-word phrases, so that foxes are multiplying	Almost all healthy adult foxes in this area can jump.
	would contain the noun <i>foxes</i> acting as the head of the noun phrase <i>foxes</i> .	[all the other words help to modify <i>foxes</i> , so they all belong to the noun phrase]
object	An object is normally a <u>noun</u> , <u>pronoun</u> or <u>noun phrase</u> that comes straight after the <u>verb</u> , and shows what the verb is acting upon.	Year 2 designed <u>puppets</u> . [noun acting as object] I like <u>that</u> . [pronoun acting as object] Some people suggested <u>a pretty display</u> . [noun phrase acting as object]
	Objects can be turned into the <u>subject</u> of a <u>passive</u> verb, and cannot be <u>adjectives</u> (contrast with <u>complements</u>).	Contrast: A display was suggested. [object of active verb becomes the subject of the passive verb] Year 2 designed pretty. [incorrect, because adjectives cannot be objects]

participle	Verbs in English have two participles, called 'present	He is walking to school. [present participle in a progressive]
	participle' (e.g. walking, taking) and 'past participle' (e.g. walked, taken).	He has taken the bus to school. [past participle in a perfect]
	 Unfortunately, these terms can be confusing to learners, because: they don't necessarily have anything to do with present or past time although past participles are used as <u>perfects</u> (e.g. has eaten) they are also used as <u>passives</u> (e.g. was eaten). 	The photo was taken in the rain. [past participle in a passive]
passive	The sentence <i>It was eaten by our dog</i> is the passive of <i>Our dog ate it.</i> A passive is recognisable from	A visit was <u>arranged</u> by the school.
	the past <u>participle</u> form eaten	Our cat got <u>run</u> over by a bus.
	 the normal <u>object</u> (<i>it</i>) turned into the <u>subject</u> the normal subject (<i>our dog</i>) turned into an optional <u>preposition phrase</u> with <i>by</i> as its <u>head</u> 	Active versions: The school arranged a visit. A bus ran over our cat.
	• the verb <i>be</i> (<i>was</i>), or some other verb such as <i>get</i> .	Not passive: He received a warning. [past tense, active received]
	Contrast <u>active</u> .	We had an accident. [past tense, active had]
	A verb is not 'passive' just because it has a passive meaning: it must be the passive version of an active verb.	
past tense	Verbs in the past tense are commonly used to:talk about the past	Tom and Chris showed me their new TV. [names an event in the past]
	talk about the past talk about imagined situations	Antonio went on holiday to Brazil. [names an event in the past; irregular past of go]
	make a request sound more polite.	I wish I had a puppy. [names an imagined situation, not a situation in the past]
	Most verbs take a <u>suffix</u> –ed, to form their past tense, but many commonly-used verbs are irregular.	I was hoping you'd help tomorrow. [makes an implied request sound more polite]
	See also tense.	
perfect	The perfect form of a <u>verb generally</u> calls attention to the	She <u>has downloaded</u> some songs. [present perfect; now she has some songs]
	consequences of a prior event; for example, He has gone to lunch implies that he is still away, in contrast with He went to lunch. It is formed by: • turning the verb into its past participle inflection • adding a form of the verb have before it. It can also be combined with the progressive (e.g. he has	I had eaten lunch when you came. [past perfect; I wasn't hungry when you came]
	been going).	

phoneme	 A phoneme is the smallest unit of sound that signals a distinct, contrasting meaning. For example: /t/ contrasts with /k/ to signal the difference between tap and cap /t/ contrasts with /l/ to signal the difference between bought and ball. It is this contrast in meaning that tells us there are two distinct phonemes at work. There are around 44 phonemes in English; the exact 	The word <i>cat</i> has three letters and three phonemes: /kæt/ The word <i>catch</i> has five letters and three phonemes: /katʃ/ The word <i>caught</i> has six letters and three phonemes: /kɔ:t/
	number depends on regional accents. A single phoneme may be represented in writing by one, two, three or four letters constituting a single grapheme.	
phrase	A phrase is a group of words that are grammatically connected so that they stay together, and that expand a single word, called the 'head'. The phrase is a <u>noun phrase</u> if its head is a noun, a <u>preposition phrase</u> if its head is a preposition, and so on; but if the head is a <u>verb</u> , the phrase is called a <u>clause</u> . Phrases can be made up of other phrases.	She waved to her mother. [A noun phrase, with the noun mother as its head] She waved to her mother. [A preposition phrase, with the preposition to as its head] She waved to her mother. [A clause, with the verb waved as its head]
plural	A plural <u>noun</u> normally has a <u>suffix</u> –s or –es and means 'more than one'. There are a few nouns with different <u>morphology</u> in the plural (e.g. <i>mice</i> , <i>formulae</i>).	dogs [more than one dog]; boxes [more than one box] mice [more than one mouse]
possessive	A possessive can be:	Tariq's book [Tariq has the book] The boys' arrival [the boys arrive]
	 a <u>noun</u> followed by an <u>apostrophe</u>, with or without s a possessive <u>pronoun</u>. The relation expressed by a possessive goes well beyond ordinary ideas of 'possession'. A possessive may act as a <u>determiner</u>. 	His obituary [the obituary is about him] That essay is mine. [I wrote the essay]
prefix	A prefix is added at the beginning of a <u>word</u> in order to turn it into another word.	overtake, disappear
	Contrast suffix.	
preposition	A preposition links a following <u>noun</u> , <u>pronoun</u> or <u>noun</u> <u>phrase</u> to some other word in the sentence. Prepositions often describe locations or directions, but can describe other things, such as relations of time.	Tom waved goodbye to Christy. She'll be back from Australia in two weeks. I haven't seen my dog since this morning.
	Words like <i>before</i> or <i>since</i> can act either as prepositions or as <u>conjunctions</u> .	Contrast: I'm going, since no-one wants me here! [conjunction: links two clauses]

preposition	A preposition phrase has a preposition as its head	He was <u>in bed</u> .	
phrase	followed by a noun, pronoun or noun phrase.	I met them after the party.	
present tense	<u>Verbs</u> in the present tense are commonly used to:	Jamal goes to the pool every day. [describes a habit that exists now]	
talk about the present		He <u>can</u> swim. [describes a state that is true now]	
	talk about the future.	The bus arrives at three. [scheduled no	w]
	They may take a suffix -s (depending on the subject).	My friends are coming to play. [describe	s a plan in progress now]
	See also tense.		
progressive	The progressive (also known as the 'continuous') form of	Michael is singing in the store room. [pre	esent progressive]
	a <u>verb</u> generally describes events in progress. It is formed by combining the verb's present <u>participle</u> (e.g. <u>singing</u>) with a form of the verb <u>be</u> (e.g. <u>he was singing</u>). The progressive can also be combined with the <u>perfect</u> (e.g. <u>he has been singing</u>).	b generally describes events in progress. It is formed ambining the verb's present participle (e.g. singing) a form of the verb be (e.g. he was singing). The essive can also be combined with the perfect (e.g.	
pronoun	Pronouns are normally used like <u>nouns</u> , except that:	<u>She</u> waved to <u>him</u> .	Amanda waved to Michael.
	In the examples, each sentence is written twice: once	<u>His</u> mother is over there.	John's mother is over there.
		<u>This</u> will be an overnight visit.	The visit will be an overnight visit .
	with pronouns (underlined), and once with nouns. The colours show where the same thing is being talked about.	He is the one who broke it.	Simon is the one: Simon broke it.
punctuation	Punctuation includes any conventional features of writing other than spelling and general layout: the standard punctuation marks . , ; : ?! () " " ' ', and also word-spaces, capital letters, apostrophes, paragraph breaks and bullet points. One important role of punctuation is to indicate sentence boundaries.	<u>"I'm going out, Usha, and I won't be long</u>	<u>g," M</u> um <u>ş</u> aid
Received	Received Pronunciation (often abbreviated to RP) is an		
Pronunciation	accent which is used only by a small minority of English speakers in England. It is not associated with any one region. Because of its regional neutrality, it is the accent which is generally shown in dictionaries in the UK (but not, of course, in the USA). RP has no special status in the national curriculum.		
register	Classroom lessons, football commentaries and novels use different registers of the same language, recognised by differences of vocabulary and grammar. Registers are 'varieties' of a language which are each tied to a range of uses, in contrast with dialects, which are tied to groups of users.		

relative clause	A relative clause is a special type of <u>subordinate clause</u> that modifies a <u>noun</u> . It often does this by using a relative <u>pronoun</u> such as <i>who</i> or <i>that</i> to refer back to that noun, though the relative pronoun <i>that</i> is often omitted. A relative clause may also be attached to a clause. In that	That's the boy who lives near school. [who refers back to boy] The prize that I won was a book. [that refers back to prize] The prize I won was a book. [the pronoun that is omitted] Tom broke the game, which annoyed Ali. [which refers back to the whole clause]	
	case, the pronoun refers back to the whole clause, rather than referring back to a noun.		
	In the examples, the relative clauses are underlined, and the colour-coding pairs the pronouns with the words they refer back to.		
root word	Morphology breaks words down into root words, which can stand alone, and suffixes or prefixes which can't. For example, help is the root word for other words in its word family such as helpful and helpless, and also for its inflections such as helping. Compound words (e.g. help-desk) contain two or more root words. When looking in a dictionary, we sometimes have to look for the root word (or words) of the word we are interested in.	played [the root word is play] unfair [the root word is fair] football [the root words are foot and ball]	
schwa	The name of a vowel sound that is found only in unstressed positions in English. It is the most common vowel sound in English. It is written as /ə/ in the International Phonetic Alphabet. In the English writing system, it can be written in many different ways.	/əlɒŋ/ [along] /bʌtə/ [butter] /dɒktə/ [doctor]	

sentence	A sentence is a group of words which are grammatically connected to each other but not to any words outside the sentence. The form of a sentence's main clause shows whether it is being used as a statement, a question, a command or an exclamation. A sentence may consist of a single clause or it may contain several clauses held together by subordination or co-ordination. Classifying sentences as 'simple', 'complex' or 'compound' can be confusing, because a 'simple' sentence may be complicated, and a 'complex' one may	John went to his friend's house. He stayed there till tea-time. John went to his friend's house, he stayed there till tea-time. [This is a 'comma splice', a common error in which a comma is used where either a full stop or a semicolon is needed to indicate the lack of any grammatical connection between the two clauses]. You are my friend. [statement] Are you my friend? [question] Be my friend! ['command'] What a good friend you are! [exclamation] Ali went home on his bike to his goldfish and his current library book about pets.
	be straightforward. The terms 'single-clause sentence' and 'multi-clause sentence' may be more helpful.	[single-clause sentence] She went shopping but took back everything she had bought because she didn't like any of it. [multi-clause sentence]
split digraph	See digraph.	
Standard English	Standard English can be recognised by the use of a very small range of forms such as those books, I did it and I wasn't doing anything (rather than their non-Standard equivalents); it is not limited to any particular accent. It is the variety of English which is used, with only minor variation, as a major world language. Some people use Standard English all the time, in all situations from the most casual to the most formal, so it covers most registers. The aim of the national curriculum is that everyone should be able to use Standard English as needed in writing and in relatively formal speaking.	I did it because they were not willing to undertake any more work on those houses. [formal Standard English] I did it cos they wouldn't do any more work on those houses. [casual Standard English] I done it cos they wouldn't do no more work on them houses. [casual non-Standard English]
stress	A <u>syllable</u> is stressed if it is pronounced more forcefully than the syllables next to it. The other syllables are unstressed.	a <u>bout</u> <u>vis</u> it
subject	The subject of a verb is normally the <u>noun</u> , <u>noun phrase</u> or <u>pronoun</u> that names the 'do-er' or 'be-er'. The subject's normal position is: • just before the <u>verb</u> in a statement • just after the <u>auxiliary verb</u> , in a question. Unlike the verb's <u>object</u> and <u>complement</u> , the subject can	Rula's mother went out. That is uncertain. The children will study the animals.
	determine the form of the verb (e.g. I am, <u>you</u> are).	Will the children study the animals?

subjunctive	In some languages, the <u>inflections</u> of a <u>verb</u> include a large range of special forms which are used typically in <u>subordinate clauses</u> , and are called 'subjunctives'. English has very few such forms and those it has tend to be used in rather formal styles.	The school requires that all pupils <u>be</u> honest. The school rules demand that pupils not <u>enter</u> the gym at lunchtime. If Zoë <u>were</u> the class president, things would be much better.
subordinate, subordination	A subordinate word or phrase tells us more about the meaning of the word it is subordinate to. Subordination can be thought of as an unequal relationship between a subordinate word and a main word. For example: • an adjective is subordinate to the noun it modifies • subjects and objects are subordinate to their verbs. Subordination is much more common than the equal relationship of co-ordination.	big dogs [big is subordinate to dogs] Big dogs need long walks. [big dogs and long walks are subordinate to need] We can watch TV when we've finished. [when we've finished is subordinate to watch]
	See also subordinate clause.	
subordinate	A clause which is subordinate to some other part of the	That's the street where Ben lives. [relative clause; modifies street]
clause	subordinate to apple (which it modifies). Subordinate	He watched her as she disappeared. [adverbial; modifies watched]
		What you said was very nice. [acts as subject of was]
		She noticed an hour had passed. [acts as object of noticed]
	However, clauses that are directly quoted as direct speech are not subordinate clauses.	Not subordinate: He shouted, "Look out!"
suffix	A suffix is an 'ending', used at the end of one word to turn	call - call <u>ed</u>
	Contrast prefix.	teach - teach <u>er [</u> turns a <u>verb</u> into a <u>noun]</u>
		terror - terrorise [turns a noun into a verb]
		green – green <u>ish [</u> leaves <u>word class</u> unchanged]
syllable	A syllable sounds like a beat in a <u>word</u> . Syllables consist of at least one <u>vowel</u> , and possibly one or more <u>consonants</u> .	Cat has one syllable.
		Fairy has two syllables.
		Hippopotamus has five syllables.
synonym	Two words are synonyms if they have the same meaning,	talk - speak
	or similar meanings. Contrast antonym.	old - elderly

tense	In English, tense is the choice between <u>present</u> and <u>past verbs</u> , which is special because it is signalled by <u>inflections</u> and normally indicates differences of time. In contrast, languages like French, Spanish and Italian, have three or more distinct tense forms, including a future tense. (See also: <u>future.</u>) The simple tenses (present and past) may be combined in English with the <u>perfect</u> and <u>progressive</u> .	He <u>studied</u> yesterday. [past tense – past time] He <u>studied</u> yesterday. [past tense – past time] He <u>studies</u> tomorrow, or else! [present tense – future time] He <u>may study</u> tomorrow. [present tense + infinitive – future time] He <u>plans</u> to <u>study</u> tomorrow. [present tense + infinitive – future time] If he <u>studied</u> tomorrow, he'd see the difference! [past tense – imagined future] Contrast three distinct tense forms in Spanish: Estudia. [present tense] Estudió. [past tense] Estudiará. [future tense]
transitive verb	A transitive verb takes at least one object in a sentence to complete its meaning, in contrast to an <u>intransitive verb</u> , which does not.	He <u>loves</u> Juliet. She <u>understands</u> English grammar.
trigraph	A type of <u>grapheme</u> where three letters represent one <u>phoneme</u> .	High, pure, patch, hedge
unstressed	See stressed.	
verb	The surest way to identify verbs is by the ways they can be used: they can usually have a tense, either present or past (see also future). Verbs are sometimes called 'doing words' because many verbs name an action that someone does; while this can be a way of recognising verbs, it doesn't distinguish verbs from nouns (which can also name actions). Moreover many verbs name states or feelings rather than actions. Verbs can be classified in various ways: for example, as auxiliary, or modal; as transitive or intransitive; and as	He <u>lives</u> in Birmingham. [present tense] The teacher <u>wrote</u> a song for the class. [past tense] He <u>likes</u> chocolate. [present tense; not an action] He <u>knew</u> my father. [past tense; not an action] Not verbs: The <u>walk</u> to Halina's house will take an hour. [noun] All that <u>surfing</u> makes Morwenna so sleepy! [noun]
vowel	states or events. A vowel is a speech sound which is produced without any closure or obstruction of the vocal tract. Vowels can form syllables by themselves, or they may combine with consonants . In the English writing system, the letters a, e, i, o, u and y can represent vowels.	

word	A word is a unit of grammar: it can be selected and moved around relatively independently, but cannot easily be split. In punctuation, words are normally separated by word spaces.	<u>headteacher</u> or <u>head teacher</u> [can be written with or without a space]	
		primary-school teacher [normally written with a hyphen]	
		<u>I'm</u> going out.	
	Sometimes, a sequence that appears grammatically to be two words is collapsed into a single written word, indicated with a hyphen or apostrophe (e.g. <i>well-built</i> , <i>he's</i>).	<u>9.30 am</u>	
word class	Every <u>word</u> belongs to a word class which summarises the ways in which it can be used in grammar. The major word classes for English are: <u>noun</u> , <u>verb</u> , <u>adjective</u> , <u>adverb</u> , <u>preposition</u> , <u>determiner</u> , <u>pronoun</u> , <u>conjunction</u> . Word classes are sometimes called 'parts of speech'.		
word family		teach - teacher	
	other by a combination of <u>morphology</u> , grammar and meaning.	extend – extent - extensive grammar – grammatical – grammarian
